M.S. in Pharmaceutical Sciences: The M.S. in Pharmaceutical Sciences program educates students in the scientific disciplines required for the discovery, development, and evaluation of new drugs and other pharmaceutical products. The thesis option trains students in basic and translational research under the supervision of a thesis advisor and committee of research faculty. This path is ideal for students interested in working as research scientists or pursuing a Ph.D. or M.D. The non-thesis option is geared toward individuals in the pharmaceutical or biomedical industry who would like to accelerate their careers with a graduate degree but who are not necessarily interested in laboratory research.

M.S. in Biotechnology: Designed to meet the needs of laboratory diagnosticians or basic research scientists, the M.S. in Biotechnology program integrates the basic sciences and laboratory innovation. Graduates of this program will improve their opportunity for advancement in their current field, in addition to gaining flexibility to pursue careers in areas such as molecular diagnostics, oncology research, forensic science, and environmental toxicology.

M.S. in Health Outcomes Research: The M.S. in Health Outcomes Research program provides the knowledge and unique skills necessary for evaluating outcomes of commonly prescribed therapies in order to guide the selection of the most effective treatments. This field will play an increasingly important role in finding better ways to provide the best care at the lowest cost.

M.S. in Cytotechnology and Molecular Cytology: The M.S. in Cytotechnology and Molecular Cytology program is designed to train students and diagnosticians to become leaders in the field of tissue and cell-based diagnostics. Students who enter this program learn to utilize traditional and innovative technologies such as image analysis, flow cytometry, and immunohistochemistry to diagnose cancer and other diseases in their early stages.

American University of Antigua - College of Medicine

American University of Antigua (AUA) College of Medicine is dedicated to providing a learner-centric medical education that meets the highest standards of academic excellence. The university is committed to providing students with the educational resources that will empower them to become compassionate physicians, life-long learners and leaders in addressing the global shortage of healthcare providers.

Brown University – Public Health

The Public Health Program at Brown University includes the fully accredited MPH Program; Master of Science degrees in Biostatistics, Epidemiology, Behavioral and Social Sciences Intervention, and Clinical and Translational Research; and PhD programs in Epidemiology, Biostatistics and Health Services Research.

Columbia University School of Nursing

Columbia University School of Nursing is part of one of the world’s most renowned academic health centers. We offer an accelerated BS/MS program for non-nursing college graduates. The program is designed to prepare the student for a career as an Advanced Practice Nurse. Additionally, we offer eight master's specialties and two doctorate programs: Research (PhD) and Doctor of Nursing Practice (DNP).

Dartmouth College, Dartmouth Institute for Health Policy & Clinical Practice

The Master of Public Health (MPH) and Master of Science (MS) curricula are designed to provide every student with the fundamental skills, knowledge base, and philosophical foundation in health policy and clinical practice, with specific attention paid to public health, clinical/health services research, or health care leadership.

Dalhousie University, Faculty of Medicine

We will be representing the four year undergraduate curriculum in the Faculty of Medicine at Dalhousie University. The first two preclinical years support the development of foundational knowledge, skills and professional behaviours with a mixture of classroom work, clinical skills and electives. The core clerkship is a 12 month experience in settings ranging from tertiary care to ambulatory and urban to rural. The final year supports student electives and preparation for career
decisions. Dalhousie's Medical School is accredited by the AAMC and graduates of our program consistently perform in the top quartile of the Medical Council of Canada exams and lead the country in obtaining the residency program of their choice.

MGH Institute of Health Professions
Boston, MA
The MGH Institute of Health Professions is an innovative graduate school with programs in Nursing, Physical Therapy, and Communication Sciences and Disorders. It is an affiliate of the world-renowned Massachusetts General Hospital in Boston and the Partners HealthCare System. The Institute offers unparalleled opportunities for students to learn and work alongside expert practitioners in a variety of hospital, clinical and community settings. The MGH Institute is located in the historic Charlestown Navy Yard in Boston, Massachusetts.

New York College of Osteopathic Medicine of NYIT
Old Westbury, NY
The New York College of Osteopathic Medicine (NYCOM) of New York Institute of Technology (NYIT) is committed to training osteopathic physicians for a lifetime of learning and practice, based upon the integration of evidence-based knowledge, critical thinking, and the tenets of osteopathic principles and practice. The college is also committed to preparing osteopathic physicians for careers in primary care, including health care in the inner city and rural communities, as well as to the scholarly pursuit of new knowledge concerning health and disease. NYCOM provides a continuum of educational experiences to its students, extending through the clinical and post-graduate years of training.

Northeastern University – Bouve Graduate School of Health Sciences
Boston, MA
The Bouve College of Health Sciences strongly supports the mission of Northeastern University as a practice-oriented, student-centered, urban research institution. The College is committed to the goals of the institution, which include excellence in education, research and scholarship, access to educational opportunity, and a strong professional orientation that includes the cooperative education model. Each of the health sciences within the College supports these aims both individually and collectively. The College consists of 3 Schools: Pharmaceutical Sciences, Nursing and Health Professions. Health Professions includes Audiology, College Student Development, Counseling Psychology, Early Intervention, Exercise Science, Physician Assistant, Public Health, School Counseling, School Psychology, and Speech-Language Pathology. There are two interdisciplinary programs with the College of Science (Biotechnology) and the College of Computer Science (Health Informatics). Degrees include the BSN/MS, MS, CAGS, and PhD. Clinical Degrees include AuD, DNP, DPT, and PharmD. There are non-degree certificates in Early Intervention and Health Informatics.

Ross University School of Medicine and School of Veterinary Medicine
North Brunswick, NJ
Ross University was founded in 1978 and is a provider of medical and veterinary education offering doctor of medicine and doctor of veterinary medicine degree programs. Located in Dominica, West Indies, Ross University School of Medicine (RUSM) places more graduates into US residencies than any other medical school in the world. Located in St. Kitts, Ross University School of Veterinary Medicine (RUSVM) is the first Caribbean veterinary school to receive AVMA accreditation and is affiliated with 23 schools of veterinary medicine in the US where students complete their clinical year. Overall, Ross University has graduated over 11,000 successful physicians and veterinarians who are practicing in all 50 US states, Canada and Puerto Rico. Ross operates on a three-semester schedule, allowing students to start in September, January or May, and has administrative offices in North Brunswick, NJ. Eligible

Tufts University, School of Medicine
Boston, MA
Tufts University (Tufts) School of Medicine offers a Master of Public Health (MPH) degree that can be obtained by itself or in combination with the MD, DVM, MS in Nutrition, BA or BS degrees offered by Tufts. It is also offered with the JD from Northeastern University, a national leader in public interest law. A Master of Science in Health Communication (HCOM) in collaboration with Emerson College and a Master of Science in Pain Research, Education and Policy are also offered. Tufts' graduates are provided with appropriate knowledge and skills to practice in the broad arena of public health.
University of Pennsylvania, Veterinary School  
*Philadelphia, PA*

Penn Vet offers the four year program, Veterinary Medical Doctorate, V.M.D. There are two major veterinary hospitals one each for both large and small animals in which to complete rotations in the fourth year. In addition, a number of weeks are permitted off campus to make opportunities available for those with specialized or broader interest than are afforded on campus. The combined VMD/PhD is also available along with the VMD/MBA at the Wharton School of Business.

University of Massachusetts Medical School  
*Worcester, MA*

The Graduate School of Biomedical Sciences at the University of Massachusetts Medical School trains students in the basic and translational biomedical sciences in preparation for conducting research with direct relevance to human disease. Graduates are expert in collaborative research involving scientists and physicians undertaking basic and clinical research. Graduates are prepared to become educators in schools of the health professions and liberal arts colleges. Graduates are also highly sought as junior scientists by the biotechnology industry.

University of Connecticut School of Dental Medicine  
*Farmington, CT*

Since its inception in 1968, the University of Connecticut School of Dental Medicine has been a prominent leader in dental education, research and patient care. As Connecticut’s only dental school and the only public dental school in New England, the school is recognized nationally and internationally for both its predoctoral and postdoctoral/graduate education programs.

University of Medicine and Health Science  
*New York, NY*

UMHS is a program offering a doctorate in medicine (MD). The academic institution is located in St. Kitts. The program enrolls students on a tri semester cycle Sept/January/May. Students are able to complete the program in three years.

University of New England College of Osteopathic Medicine  
*Biddeford, ME*

The University of New England College of Osteopathic Medicine (UNE COM) is committed to serving the people of New England through an emphasis on educating primary care physicians. UNECOM offers academic excellence, a supportive learning environment and a beautiful ocean-side campus. Centers of Excellence include Neuroscience, and Community and Public Health. The College has been recognized for excellence in primary care, osteopathic manipulative medicine, and geriatric education.

University of Queensland SOM – Oschsner Clinical School  
*New York, NY*

The University of Queensland School of Medicine-Ochsner Clinical School is designed for outstanding students who are American citizens or permanent residents and who wish to obtain a global medical education before residency and practice in the United States. U.S. students spend two years in Brisbane, Australia, at the University of Queensland SoM, one of the most highly ranked medical schools in the world. Students then spend two years in clinical training at the Ochsner Health System’s Clinical School in New Orleans, Louisiana. Ochsner is among the nation's finest academic medical centers.
