

Barton, D., J. Cahill, E. Hickey, H. Iken, K. Miller, and L. Schreiber (1985). "A Beachcomber's guide to Morse Mountain".

This guide acts as a written and visual reference to the identification of common species of Algae, Birds, and Shells that can be found in the Morse Mountain area. This guide also includes an in-depth written and visual description of two common Morse Mountain species: the Harbor Seal (*Phoca vitulina*) and Least Tern (*Sterna sbifrons*).
