

ALUMNI GYM BLEACHER & FLOOR REPLACEMENT PROJECT

(Renovation)

Architect: Bates

Contractors: New England Sports Floors
Robert H. Lord Co.

Completion Date: Summer, 2018

Total Square Feet: ~12,895

Programmatic Drivers:

The wood floor and bleachers in Alumni Gym are beyond the useful life. The floor has been sanded the maximum number of times and has outdated game lines and the wrong school logo. Sections of the bleachers are not operating correctly due to missing wheels and broken parts. As a result, Custodial has to assign multiple people to the job of pulling the bleachers in and out to prevent injury. Over the years, time and money has been invested in making repairs to the bleachers, but they are now at the point where a greater investment is needed. It naturally makes sense for the replacement of the bleachers and floor to occur in conjunction with one another.
