

JOHN BERTRAM HALL RENOVATION PROJECT

(Renovation)

STRUCTURAL ENGINEERING: HARRIMAN of Auburn Maine

CONTRACTOR: TBD

COMPLETION DATE: August 2019

TOTAL SQUARE FOOTAGE: 5,700 square feet

PROGRAMMATIC DRIVER: Update roof structural elements to meet current snow load standards

PROJECT DESCRIPTION: John Bertram Hall is a four story building comprised of the original building, built in the mid 1800's, and stair additions on each end added in 1979. Over the summer additional wood beams will be sistered to the heavy timber roof framing of the original construction to increase its load bearing capacity to meet current snow loading requirements.
