

MERRILL GYM SPORTS MED

(Renovation)

CONTRACTORS: TBD

COMPETITION DATE: Summer 2019

PROGRAMMATIC DRIVER: The Sports Medicine program has outgrown the ~800 sq. ft. suite on the ground floor of Merrill. As a result, student athletes are utilizing the main corridor to stretch and receive treatment.

PROJECT DESCRIPTION: The Department of Athletics has requested the underutilized handball court on the second floor of Merrill be converted to act as an extension of the Sports Medicine Program. Along with this work, they have identified additional programmatic changes and architectural upgrades that would greatly improve the buildings functionality.
