

Interested in STEM?

YES!

Check out these courses
available for the Fall and
Winter semesters!

PHYSICS* & ASTRONOMY

FALL: PHYS107 and
MATH105 or beyond
depending on your
past math coursework
(*PHYS211 may be
appropriate, depending
on prior coursework*)

LIFE SCIENCES (BIOLOGY, BIOCHEMISTRY,* NEUROSCIENCE,* PRE-HEALTH)

FALL: CHEM107*
FALL OR WINTER: BIO195

ENVIRONMENTAL STUDIES*

FALL OR WINTER: ENVR204 or
ENVR205, and another introductory
science course (e.g. BIO195,
CHEM107/108,* GEO104, GEO107,
MATH106, MATH205, PHYS107)
WINTER: ENVR203

CHEMISTRY

FALL: CHEM107,*
MATH105 or beyond
depending on your
past math coursework

MATH

FALL: MATH105,
MATH106, MATH205,
or MATH206
depending on
your past math
coursework

Bates

GEOLOGY (EARTH SCIENCE AND CLIMATE SCIENCE)

FALL: GEO104,
GEO107, or FYS476

* Environmental Studies and
Neuroscience are interdisciplinary
programs in which STEM-courses
make up only some of the courses
in the major.

* If you are interested in majoring
in chemistry or any of the life sciences,
CHEM107 is an essential course to
take in the fall of your first year.

* Biochemistry majors who are
considering study abroad may
want to begin the MATH105/106
sequence in their first year.

* Engineering interested students
should contact Prof. Nathan Lundblad.
